

E-training tool descriptor

Supra-category: IOTC ROS Observer Co-ordinator Training (IOTC ROS OLC)

Category: IOTC ROS data collection and management tools (TR8)

Course: IOTC ROS e-Tools: National Database Installation (TR 8.04)

Course Description

The IOTC ROS National Observer Database aims at providing CPCs with a centralized repository where all information recorded by observers authorized by the flag country can be collected, managed and analysed.

The National Database is provided, to CPCs approved Observer Providers, with a setup programme that will take care of installing all the required components. The setup file will be available for Windows, Mac OSX and Linux platforms and as its only dependency it will require Java 8 (either as JDK or JRE) and an internet connection to be installed on the target machine.

The objective of this course is to familiarize participants to the Observer Coordinator Workshops (OCW) with IOTC ROS National Database installation process.
