
ON THE LIMITATION OF FISHING CAPACITY AND FLEET DEVELOPMENT PLANS

Prepared by the IOTC Secretariat

This document summarises the information available to the Secretariat in accordance with IOTC Resolution 09/02 *On the implementation of a limitation of fishing capacity of Contracting Parties and Cooperating non-Contracting Parties*.

Paragraph 1. Contracting Parties and Cooperating non-Contracting Parties (CPCs) shall notify to the IOTC Secretariat, by 31 December 2009, the lists of vessels, by gear type, of 24 meters overall length and over, and under 24 meters if they fished outside their EEZs, and corresponding overall capacity in GT, which have actively fished in accordance with the provision of IOTC Resolution 07/04:

- for tropical tunas during the year 2006
- for swordfish and albacore during the year 2007

Tables 1 and 2 indicate the baseline limits on fishing capacity based on the tonnage and numbers of vessels declared as active in 2006 (for tropical tunas) and 2007 (for swordfish and albacore). In view of the low numbers of reports that have been received in accordance to paragraph 1 of Resolution 09/02, the Secretariat has used the reference capacity reported under Resolution 07/04 for 2006 and 2007 for those CPCs that have not submitted their report. Figure 1 further illustrates the low level of compliance to reporting target species.

Table 3 provides a comparison of the baseline capacity in both fisheries against the capacity reported for 2008.

Paragraph 6. CPCs which had the objective of developing their fleets following the provisions of IOTC Resolution 03/01, through the introduction to the IOTC of a fleet development plan, shall confirm, by 31 December 2009, inter alia, the type, size, gear and origin of the vessels included in the Fleet Development Plans and the programming (precise calendar for the forthcoming 10 years) of their introduction into the fisheries.

The Commission has received revised Fleet Development Plans from France (OT) and the European Union. Thailand has provided information on the capacity of the vessels in their Fleet Development Plan. Figure 2 illustrates the number of vessels that CPCs will add in accordance to their Fleet Development Plans. A compendium of the Fleet Development Plans is found in IOTC-2010-S14-CoC17 Add1.

Table 1. Corresponding overall capacity of CPCs whose fleets targeted tropical tunas during the year 2006 and CPCs who intends to introduce new vessels, through fleet development plans, to target tropical tunas. A blank indicates no data was received.

	Capacity (GT)	578,861	16,310	2,000	10,000	2,319	12,319	2,319	2,319	-	-	1,286

ⁱ Has not reported reference capacity, as per Resolution 09/02. The capacity reported in this table is capacity reported under Resolution 07/04 for 2006. In the majority of cases, no targeting has been reported..

ⁱⁱ The EU has indicated that a further fifteen longline vessels will be added after 2006, but before the end of 2015. The additional 15 vessels will increase the capacity of the EU by 3,375 GT. No target species has been provided; it is assumed that the vessels will target tropical tunas.

ⁱⁱⁱ France (OT) has indicated that seven existing longliners currently configured to target toothfish, will in the future be converted to fish for tunas. No specific time-line for the introduction of these vessels has been provided. This will contribute to an increase in capacity of 8,230 GT.

^{iv} India is still in the process of preparing its Fleet Development Plan (*cf. Mission report of Compliance Coordinator to India*).

^v Indonesia is still in the process of preparing its Fleet Development Plan (*cf. Mission report of Compliance Coordinator to Indonesia*).

^{vi} Iran has not indicated target species; it is assumed that the vessels will target tropical tunas.

^{vii} The reference capacity for the Republic of Korea for Tropical Tunas is that of the year 2000.

^{viii} Malaysia has not indicated target species; it is assumed that the vessels will target tropical tunas.

^{ix} Mauritius has not indicated target species; it is assumed that the vessels will target tropical tunas.

^x Oman has not indicated target species; it is assumed that the vessels will target tropical tunas. Oman will add a further 10 purse seiners and 25 longliners to its fleet between 2016 and 2025; no reference capacity (GT) or target species have been provided.

^{xi} Pakistan has not indicated target species; it is assumed that the vessels will target tropical tunas. Pakistan has also not provided any reference capacity (GT) for the vessels that will be introduced into its fleet. It is also assumed that the vessels will be added in equal numbers over the five-year period, starting from 2006.

^{xii} Seychelles has not indicated target species; it is assumed that the vessels will target tropical tunas. Seychelles has also not provided any reference capacity (GT) for the vessels that will be introduced into its fleet.

^{xiii} Thailand has not indicated target species; it is assumed that the vessels will target tropical tunas.

^{xiv} Vanuatu has not indicated target species; it is assumed that the vessels will target tropical tunas. Vanuatu has not provided any reference capacity (GT) for the vessels to be introduced into its fleet.

^{xv} South Africa has not indicated target species; it is assumed that the vessels will target tropical tunas.

Table 2. Corresponding overall capacity of CPCs whose fleets targeted swordfish and albacore tuna during the year 2007 and CPCs who intends to introduce new vessels, through fleet development plans, to target swordfish and albacore tuna. A blank indicates no data was received.

ⁱ Has not reported reference capacity, as per Resolution 09/02. The capacity reported in this table is the capacity reported under Resolution 07/04 for 2007. In the majority of cases, no targeting has been reported.

ⁱⁱ Includes the capacity for vessels reported as also targeting tropical tunas.

ⁱⁱⁱ The capacity provided relates to two vessels.

ⁱ Includes the capacity for seven vessels reported as also targeting tropical tunas, thus resulting in double counting.

ⁱⁱ Data from Report of implementation

ⁱⁱⁱ The reference capacity for the Republic of Korea for Tropical Tunas is that of the year 2000. The same vessels are targeting the two groups of species, therefore, leading to double counting of the capacity.

^{iv} Includes the capacity of three vessels reported as also targeting swordfish and albacore, thus resulting in double counting.

Figure 1. Level of compliance to the reporting of main target species

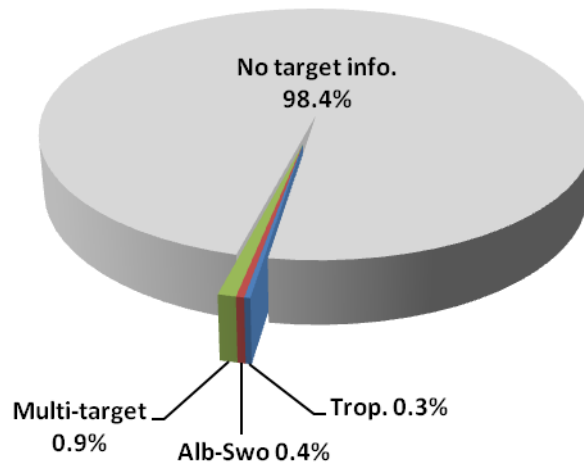

Figure 2. Vessels to be added under the Fleet Development Plans
