

ANNUAL REPORT OF IMPLEMENTATION TO IOTC FOR THE YEAR 2010

Reporting CPC: TANZANIA

Reporting CPC: TANZANIA

Date: 14/03/2011

Part 1 A: Actions taken under national legislation, in 2010 to implement conservation and management measures adopted by the Commission at the last session

Resolution 10/01: For the Conservation and Management of Tropical Tuna Stocks in the IOTC Area of Competence

Fishing vessels licensed by United Republic of Tanzania to fish within the IOTC area of competence in 2010 and 2011 have been instructed in writing to observe the area and period closer as prescribed by resolution 10/01.

All Tanzania flagged and all non Tanzanian flagged fishing vessels licensed to fish in the United Republic of Tanzania EEZ are legally required to have Vessel Monitoring System. However, our VMS server was out of order since January 2010 and it took time to procure a new server but it is now in place and will be operational before 30th of March 2011.

Despite all this, vessels which are fishing in our EEZ do give us information with regard to date and time of entry and exit, as well as location and catch data.

Resolution 10/02: Mandatory Statistical Requirements for IOTC Member and Cooperation non-Contracting Parties

Up till March 2010, the United Republic of Tanzania's EEZ was managed by two different administrative and political jurisdictions (Tanzania and Zanzibar). This arrangement did not augur well for the conservation of EEZ fishery as required by FAO code of conduct and this very IOTC resolution. Realizing the importance of the sustainability of the EEZ fishery a single EEZ fishery management regime in the name of Tanzania Deep Sea Fishing Authority was legally established by Act No. 04 of 2007 and became operational in March 2010. This newly formed Authority which has been in place for only 11 months is working hard to meet all IOTC resolutions.

Having regard, to total compliance to the IOTC convention and resolutions made thereof, the required statistical data under this resolution is under compilation and is expected to be ready by June 30th 2011.

Resolution 10/03: Concerning the Recording of Catch by Fishing Vessels in the IOTC Area.

As above, this report will be ready by June 30th 2011.

Resolution 10/04: On a Regional Observer Scheme

It is only DWFN that exploit the fishery of our EEZ and the owners have refused to take observers on board on ground of space and high insurance cost due to Somali Pirates.

Resolution 10/06: On Reducing the Incidental Bycatch of Seabirds in Long line Fisheries

As said above, fish harvest in our EEZ is done by DWFN fleets which do not call in our ports and we do not have capacity to monitor. However, written instructions to adhere to this resolution are given on issuing licenses.

Resolution 10/07: Concerning a Record of Licensed Foreign Vessels Fishing Tunas and Swordfish in the IOTC Area.

Raw data exist in Tanzania Mainland and Zanzibar fisheries data bases and it is under compilation. The processing of this data is expected to be completed by 30th June 2011. The data since the establishment of the Authority i.e. for 2010 is however available and attached.

Resolution 10/08: Concerning a Record of Active Vessels Fishing For Tunas and Swordfish in the IOTC Areas

Same action is applicable as Resolution 10/07 above.

Resolution 10/10 Concerning Market Related Measures

This resolution is not applicable to the United Republic of Tanzania because we do not have local industrial or semi-industrial fleet targeting Tuna and Swordfish. The Tuna and Swordfish caught by the artisanal fishers within the territorial water is consumed locally. As explained before a report is being complied along with others.

Resolution 10/11: On Port State Measures to Prevent, Deter and Eliminate Illegal Unreported and Unregulated Fishing

Tanzania does not have fishing ports; therefore we have no records of fishing vessels calling in our ports.

Resolution 10/12: On the Conservation of Thresher Sharks Caught in Association with Fisheries in the IOTC Agreement Area

The Tanzania Deep Sea Fishing Authority Regulations 2009 prohibits disposal of sharks at sea after removing fins. According to this regulation sharks are allowed only when caught incidentally by purse seiners. However at the moment we have no capacity to monitor and enforce.

Resolution 10/13: On the Implementation of a Ban on Discards of Skipjack Tuna, Yellowfin Tuna, Bigeye Tuna and non-Targeted Species Caught by Purse Seiners

The Tanzania Deep Sea Fishing Authority Regulations 2009, prohibits discards of all kinds of catches including those mentioned above.

Part 1B: Actions taken under national legislation to implement conservation and management measures adopted by the Commission in previous sessions.

The United Republic of Tanzania's marine fishery is exclusively artisanal limited to territorial waters while the EEZ is exclusively for DWFN up to now. However, the Deep Sea Fishing Authority Regulations of 2009 provide adequately for the conservation of the Fisheries resources as per FAO Code of Conduct for Responsible Fisheries as well as the various applicable IOTC resolutions.

With regards to IUU fishing Tanzania submitted to IOTC in September 2010 names of three vessels which conducted illegal fishing in the Tanzania EE as shown below.

TABLE OF IUU VESSELS IN TANZANIA EEZ DURING 2010

No	Name of vessel	Call sign	Type of vessel	Flag state	Position observed	Date
