

# Electronic tagging of yellowfin and bigeye tuna in the Indian Ocean

IRD and CAP RUN (Reunion Island) are placing electronic tags on yellowfin tuna, bigeye tuna, and other pelagic fishes within framework of the collaborative project PROSPER

# 50 €

## REWARD !!!

for the return of  
an electronic tag\*

\*the **ENTIRE** fish will be  
reimbursed separately

## ELECTRONIC TAGS

Archival satellite tags LOTEK PSAT (left) and Wildlife Computers mini-PAT (right) are attached to the dorsal part of the fish.

Each tag has unique identification number.

All fish are also tagged with 2nd tag of 'spaghetti' type (IOTC).

## IF YOU FIND A TAGGED FISH

Record the following information:

- ✓ Species
- ✓ Tag(s) identification number(s)
- ✓ Date and time of recapture
- ✓ Exact geographic position (latitude et longitude)
- ✓ Length of the fish (FL)
- ✓ Your name and name of the boat

Bring back to the port **entire fish with a tag**

The fish will be bought from you and IRD will pay a reward of 50€ for the tag
